

RU Riding?

Dylan Miller, Victoria Kokoszka, Sean Davison, Xiangyi Hong,
Michael Schulke

Business Concept

- A student run shuttle service: where students with cars match with their peers and faculty who are going to the same class or general region of their university's campus. and carpool together for a very small fee or not fee at all.
- Students pay cheaper prices than traditional ride share companies, and drivers can earn money in their daily commute.
- "RU Riding?" is a safer alternative to Uber, and a faster, more efficient service compared to a university bus system.

Customer Value Proposition

Why Choose RU Riding?

- Beats the Buses
 - Avoid crowded, slow, and unreliable campus buses
 - Enjoy comfortable, traffic-friendly rides at a very low price
- Smarter Alternative to Ride-Shares
 - Significantly cheaper than Uber or Lyft
 - By being with verified peers, you can ride safer and more comfortably
 - Drivers share your urgency with getting to class on time
- Rewarding for Drivers
 - Get paid for a commute you're currently making
 - Guaranteed, secure payments from verified student riders
- Community Driven
 - A student-run shuttle service built specifically for each university campus
 - Carpool to the same areas for a minimal fee.

Vision Statement, Mission Statement, and Core Values

Vision Statement:

Empowering our community through sustainable, ethical, and trusted transportation

Mission Statement:

To provide university students with faster, cheaper commutes while offering peers a flexible way to earn cash

Core Values:

Safety First: Verified Student Profiles and ride-tracking accountability

On Time: Being on time isn't a goal, but a standard for our drivers

Student-Led Equity: Keeping costs low so reliable transit is accessible to everyone

Sustainability: Reducing the campus carbon footprint by filling empty seats

Financial and Strategic Objectives

Financial

1. Achieve a positive net cash flow by the end of the first year of operation
2. Achieving a return on invested capital (ROIC) of >5% by the end of calendar year 2026
3. Raise \$10,000 in equity financing by the end of the first year of operation

Strategic

1. Have at least 25% of our customers who visit our app/website and book a ride with RU Riding by the end of our first year of operation.
 2. Reach at least 5,000 local customers through social media marketing and at least 5% of those visiting our app/website by the end of the calendar year.
 3. Increasing the number of returning customers by at least 25 customers per month for the first year of operation.
- 

Corporate Social Responsibility Key Initiatives and Rationale

1. Buyback Carbon Emissions

- As a rideshare company, we inherently contribute to the pollution of our atmosphere. If we donate/buyback our carbon emissions, we make our customers more comfortable with using our service.

2. Women's Safety

-The safety of women is always important, and by implementing more regulations and safety checks , more women will hopefully begin to use the service and feel more comfortable.

3. Electric Vehicle Savings

- Similar in nature to the other proposals, we encourage students to carpool with EVs, as they are the most environmentally friendly vehicle.

New Product/Service and Expansion Decision

New Product: **RU X**

- Have onboard amenities such snacks, waters etc.
- Have a female mode, where if woman felt uncomfortable they would be able to choose a female driver.
- Have quicker pickup and drop off times.

Expansion Decision: **Raise Capital**

- Raising capital for our company because we want to ensure our customers always get a high-quality product, regardless of what university they go to. If we chose to franchise, we would be risking the consistency of our service while also losing a significant chunk of profits.

Global Expansion

Canada

Opportunities in Canada:

- US and Canada already have integrated economies
- Logistics, shipping and travel would be incredibly cheap comparatively
- Similar cultures

Opportunities in Canada:

- The student population isn't very high compared to other countries
- Some barriers come with differing regulations between provinces and territories
- Language Laws in Quebec

Rationale: Overall, it makes sense to pick Canada because despite the challenges, Canada has the most similarities with the United States' culture. This will make it much easier to assimilate our product into Canadian universities. The close proximity to the United States is also a bonus.

Expansion Strategy

Global Standard

A global standard would be best for our expansion, especially in Canada due to how the markets are relatively the same and the product is not easy to customize.

The idea of this business will always stay the same, and Canada is quite easy to implement this with a global standard.

Entry Strategy

Joint Venture

A joint Venture would be best because the beginnings of the business would already be off the ground, and with the added fact that we would have real Canadians who know the people and the system looking after the rest of the specifics of the country that we are not aware of. All this while still having a good amount of control and profit.

Key Job

Student Drivers

Responsibilities:

- Transport other students efficiently and quickly from point A to point B
- Follow company standards of clean vehicles and safe driving practices
- Complete all rides to the best of your ability

Qualification's:

- Student at an established University
- Working vehicle for transportation
- Show forms of ID
- Completed Resume

Plan: Pay per ride, fixed rate of \$5 per person + tips. The longer the ride, the more money the drivers can make. Pay plan is more nuanced than just \$5 and serves as a reasonable starting rate.

Job Advertising

Plan:

- Social Media outreach to University Students requesting drivers to work with us
 - Word-of-mouth
 - Social Media Advertising

Criteria:

- At least 2 years of driving experience
 - Resume and ID provided
 - Clean driving record

Employee Motivation Initiatives

- Paid-time doing volunteer work with other employees
- Bonuses for having zero issues during driving/good costumer reviews
- Work retreat every year for employees
- After 5 years of work: 15% raise
- Free Gas per every 6 months of strong work driving

Employee Announcement

- Two of our employees recently left the company due to dissatisfaction with the work environment
- We take this seriously and are making changes to improve the experience for everyone
- New initiatives being implemented immediately
 - Paid time for volunteer work with coworkers
 - Performance bonuses for safe driving and good reviews
 - Free gas every 6 months for strong performance
 - Yearly company retreat
 - 15 percent raise after 5 years
- Our goal is to create a better work environment and keep employees long term

Employee Engagement Drivers

- **Key Drivers**

- strong leadership and communication
- positive work culture
- employee support and flexibility
- recognition and growth opportunities

- **Actions we are taking**

- connect employee work to CSR initiatives
- hybrid work setup for better balance
- frequent engagement surveys
- adjust workloads to prevent burnout
- open office environment for collaboration
- team events like dinners and socials

SIPOC – Ride Matching Process

- **Suppliers**

- student drivers
- app/technology platform
- payment system

- **Inputs**

- driver availability
- rider requests
- location data
- vehicles

- **Process**

- rider requests ride
- system matches rider with driver
- driver picks up rider
- ride completed
- payment processed

- **Outputs**

- completed rides
- payment received
- customer feedback

- **Customers**

- students and faculty
- want fast cheap safe rides
- desired behavior = repeat usage + good reviews

Measurement Charts

Effectiveness

- Goal: 90%
- Current: 85%
- Status: Not meeting goal
- Reason: wait times
- Fix: better matching

Efficiency

- Goal: \$7.25
- Current: \$8.50
- Status: Not meeting goal
- Reason: low carpool usage
- Fix: shared ride system

Item 17

Description of key initiative to improve the process described in item

Our key initiative is to improve process efficiency through an upgraded shared-ride and carpool system. Based on the Q4 WDM chart, the current average cost per completed ride is \$8.50. Although this is better than our internal goal of \$9.00, it is still higher than our main competitor at \$7.50 and the benchmark level of \$6.00.

Therefore, our target is to reduce the average cost per ride to \$7.25 by the end of Q4 2026. To achieve this, we will improve the “Matched with Driver” and “Transit” stages in our SIPOC process by using better matching technology to group students and faculty members travelling in the same direction into one vehicle.

This will increase vehicle capacity, keep labor and fuel inputs more stable, reduce unnecessary empty trips, and lower the average cost per ride while maintaining service quality.

Item 18

Team decision on whether to sell the business or not and rationale

Our team decides not to sell the business. Even though the offer is legal and financially attractive, we believe accepting it would create serious risks for the future of the company. The potential buyers do not have experience running this type of business, and they plan to move the headquarters to their own country. This would likely lead to job losses for current employees and create uncertainty for company-owned business units.

We also believe that selling the company would go against what our business stands for, including loyalty to our long-term employees, responsibility to suppliers, and commitment to the wider economy.

While shareholders may be disappointed in the short term, our company is still growing successfully, so we believe they can continue to benefit over time without selling the business.

Item 19

Summary of why your business has been successful

- Our business has been successful because it combines strong management decisions, customer focus, continuous performance improvement, and ethical leadership. The company has grown into a successful global enterprise by making sound strategic decisions and managing operations effectively. It pays close attention to key processes by mapping them clearly, measuring effectiveness and efficiency, and introducing targeted improvements when performance can be strengthened.
- At the same time, the business remains focused on customer needs, such as safe transportation, accurate billing, on-time service, and customer satisfaction.
- In addition, the company has demonstrated responsible leadership during expansion by rejecting unethical financial incentives and by considering the long-term interests of stakeholders. Overall, our success comes from efficient operations, responsible values, and a long-term commitment to sustainable growth.
